CORKSTEEL

THE CONNORS HOE AND TOOL COMPANY

WE HAVE A VERY MODERN PLANT

To the Buyer of Steel Goods

IN presenting this, our first catalogue, we desire to call attention to an innovation in the construction of Steel Goods — ALL STEEL TOOLS with CORKSTEEL HANDLES, and trust you will give the line your careful consideration.

The men at the head of this company have been in the Steel Goods business for over thirty years and are familiar with every detail of the business, and this new line we are offering to the trade is the result of this experience.

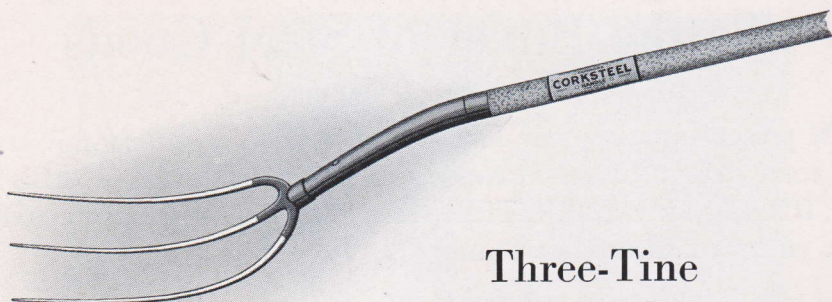

Our new CORKSTEEL HANDLE, of about the same weight as the regular ash handle, is made from special high grade steel, wrapped the entire length with cork, put on with a waterproof cement and will not come off. The handle will not get hot or cold, has a soft pliable feel to the hand, will not wear off and keeps the hand from becoming blistered or calloused.

On our line of HOES, the shank is welded into the handle, making blade, shank and handle one piece, preventing the hoes from coming loose from the handle, which is an entirely new feature. On our other tools, the head is riveted into the handle and will not come loose.

In the manufacture of Ash Handles, they must of necessity vary in quality — they cannot all be "Firsts" and to use the poorer qualities of handles, cheaper grades of tools are made. Our CORKSTEEL HANDLES being all the same grade, will permit our making but one quality of tools, THE BEST, and we are confining our line to the manufacture of standard items only as shown in this catalogue.

It is our aim to give the trade a line of tools unequalled for long and arduous service, exceeding that of the best now made with wood handles and trust our product will merit the patronage of all discriminating tool users.

Hoes

All of our hoes are made in Socket Pattern, the shank is welded into the Steel Handle making the blade, shank and handle one piece which overcomes the present constant trouble of hoes becoming loose and pulling out of the handle. The blade is made from steel of a special analysis which gives it extra strength and will hold a good sharp cutting edge. Our hoes are stronger, will last longer and give more service than any other hoe now made.

Our Guarantee

OUR tools are made from the very best materials by experienced workmen and our one aim is to make tools that will last long and give good service. Should any of our tools prove defective when used in the work they were intended to do, we will cheerfully replace or give credit for same.

Defective tools must be returned to us, as in this way only can we find the cause of the defects and overcome same.
